## Summary

I am a Node.js backend developer with 2 years of experience in the software development industry. I specialize in developing custom web applications and REST APIs using Node.js and the Express.js framework.

I have extensive experience working with various databases such as MongoDB, PostgreSQL, and Redis. I have a deep understanding of the server-side technologies needed to build secure and scalable web applications. I am also experienced in using popular web frameworks such as React.js, and React Native.

I am always striving to improve my coding skills and stay up to date with the latest web technologies. I'm a quick learner and always looking for new challenges and opportunities to grow. I believe that the key to success in software development is continuous learning and collaboration with other developers.

## Key Achievements

As a backend developer, I am proud of the achievements I have made over the years. I have worked on various projects, from simple website creation to complex web applications. I have gained experience in multiple programming languages, such as JavaScript, Typescript, and few of python. I have used a variety of frameworks and libraries to create dynamic web applications and APIs.

My most notable achievement is my work with a team of developers on a dispatch rider web and mobile responsive application. This application allowed users to create profiles, share posts, and connect with each other. I was responsible for developing the backend logic and architecture that enabled the application to run. I had to create database schemas, set up API endpoints, and integrate with third-party services. It was a complex project, but I was able to deliver a successful product.

## Areas of Expertise

NodeJS	JavaScript	Typescript	MongoDB	Postgress
RESTful API's	React	React Native	Express Framework	HTML5

## Experience

**Software Developer**, [Decagon], Edo State Nigeria

2022 August

Part of a full stack web development team creating a progressive web version of a successful new book-a-ride application, Dispatch rider application (Swift-Rider).

**AUTO Mart Branch Manager, SEE AUTO, Benin City**

2021 August -Dec 2021

I was responsible for Hiring, training, motivating and coaching employees as they provide attentive, efficient service to customer. Assessing employee performance, providing helpful feedback, and training opportunities. Coordinate the development, delivery and evaluation of staff learning and development programs. Develop and facilitate relevant “in-house” training programs for effective delivery of services. Coordinate the development, delivery and evaluation of a suite of leadership development programs.

**Workshop Manager, SEE AUTO, Benin City**

2021 February-July 2021

I was responsible for the day to day safe and efficient running of the mechanical workshop, budgets for the purchase of materials, fixings and fastenings and machine tools to ensure the smooth progression of jobs through the workshop.

**Protocol Officer, SEE AUTO, Benin City**

2020 January, 2020

As the protocol officer, I facilitate cross-cultural relations and communications in establishing distinguished events and etiquette standards while uplifting my organization brand - both internally and externally - to outshine competition.

## Projects

**Feed-fine**

The restaurant listing app built with React Native makes use of geolocation to provide users with a list of restaurants in various cities that are available for food delivery. The app is integrated with Firebase as the backend to manage user authentication, data storage, and real-time updates. Users can select their location and view nearby restaurants, check their menus, prices, and ratings, and place orders directly from the app.

**Book a Ride App**

An app that offers several features to make it easier for users to book a ride. Users can easily search for nearby drivers, select the type of vehicle they need, and even get an estimated price for the ride. The app also makes it easy to pay for the ride with a credit card or other payment method.

## Food Ordering App

This is an innovative food delivery app that allows users to order food online and get it delivered right to their doorstep. With this app, users can order food from local restaurants, cafes, and other eateries with just a few taps on their smartphones. The app features a wide variety of cuisine options from far and near, so users can find something to satisfy their cravings no matter what their tastes are.

## Education

Technical Education, Adekunle Ajasin University, Akungba Akoko, Ondo State.  
B.Sc. (Technical Education)

2013-2017

## Trainings Attended with Certifications

Scrum study: Scrum Fundamentals Certified

2022

EFSET English Certificate

2022

Google Africa Developer Training, Software Development

2022

Google Digital Skills for Africa, The Fundamentals of Digital  
Marketing

2021

Internship in International Development, Dataville Research LLC

2021
